EXTERNAL COMMUNICATION

To: B3's Market Participants – BM&FBOVESPA Segment

Re: **New Version of LiNe 5.0 Pre-Trading Risk Control System – Alterations to API and Correction of Defects**

As part of the process of continuous improvement of its systems and preparation for the launch of LiNe Clearing, on **March 1, 2021**, B3 will implement a new version of the LiNe 5.0 pre-trading risk control system with alterations to the API and correction of defects, including those described below.

1. Alteration to queries via API

Inclusion of the new attribute "coreType" in the endpoints listed below, responsible for Consumption Ranking, Current Position and Position History screen functionality:

- /v1.0/position/rank
- /v1.0/position/hstry
- /v2.0/position/current
- /v2.0/position/hstry

The API documentation is available at <https://line.trd.cert.bvmfnet.com.br/#/endpoints>. Login authentication by certification environment username and password is required to access this documentation.

On a date to be announced in July, the endpoints listed below will be disabled and it will be necessary to use version 2.0 of the API:

- /v1.0/position/hstry
- /v1.0/position/current

021/2021-VOP

2. Corrections

- a) Processing of at-the-market bids for fixed-income ETFs.
- b) File uploading for give-up carrying participants.

These changes may be validated by market participants during the mock trading session scheduled for **February 27, 2021**, as per External Communication 006/2021-VOP, dated January 14, 2021.

The technical specifications for the LiNe 5.0 pre-trading risk control tool can be found at http://www.b3.com.br/en_us, Solutions, Platforms, Risk Management, LiNe 5.0, Specification.

B3 will continue to upgrade LiNe 5.0 and more changes will be announced in due course.
