Re.: **Entrypoint FIX – Update to the Trading Gateways and Drop Copy**

We hereby inform you that as of **May 27, 2024**, an update will be implemented in waves at Entrypoint FIX Trading Gateways and Drop Copy as part of the B3 Trading Systems' continuous enhancement process.

With the update, Entrypoint FIX Trading Gateways and Drop Copy will convert B3's internal binary protocol messages generated by the matching engine into Entrypoint FIX messages during publication. This change will optimize the flow of Execution Report publications and will allow greater determinism in the functioning of the platform.

Converging with this change, some messages will undergo small behavior changes as set out in the Customer Impact Document (CID) available at www.b3.com.br/en_us/, Solutions, Platforms, Puma Trading System, Developers and vendors, FIX Order Entry, Customer Impact Document Entrypoint System Update.

The changes have been available in the certification environment, for testing and validation, since **April 13, 2024**.

023/2024-VNC

The timetable for the update of these changes will be realized in waves as described on the <https://clientes.b3.com.br/en/> website, at B3 Tech Launches | Trading, New Version GWOE – Migration to Entrypoint Binary (SBE) and New Version GWDC – Migration to Entrypoint Binary (SBE).

Further information can be obtained from B3 Services - Trading by telephone on +55 11 2565-5021 or by email at tradingsupport@b3.com.br
