EXTERNAL COMMUNICATION

To: B3's Market Participants – BM&FBOVESPA Segment

Re: **LiNe Entry Point – Change in the Structure of Equivalent Instruments and Exchange Limits for LiNe Equities.**

We hereby inform you that at the end of the trading session on Friday, June 22, 2018, a change in the Structure of Equivalent Instruments and Exchange Limits for LiNe Equities will be implemented, with the purpose of increasing the efficiency of this risk management tool.

The change is restricted to recomposition of the groups of Equivalent Instruments so that the current groups Ações 2, Ações 3 and Ações 4 become consolidated into the group Ações 1, resulting in a single group for the equities segment. It is important to note that the group Renda Fixa will not be subject to any change whatsoever.

Participants may use the mock trading session on Saturday, **June 23, 2018**, to adjust the limits of their investors to the limit of the Equivalent Instrument (LCC/LVC) Ações 1. All these adjustments will be reflected by the tool on Monday, June 25, 2018.

To assist participants, files that are the same as the Exchange's limits file and Factor K – equities segment (available at www.bmfbovespa.com.br/en_us/, Services, Trading, BM&FBOVESPA PUMA Trading System, Participants and traders, Tools for trades, Trade risk management - LINE) will be sent upon request, covering the changes.

These files may be requested from Trading Support by email at Trading Support tradingsupport@b3.com.br telephone on +55 (11) 2565-5000, option 2.

Further information about the structure of Equivalent Instruments and Exchange Limits can be obtained from Central Counterparty Risk by email at gmr@b3.com.br or by telephone on + 55 (11) 2565-6042/4917.
