EXTERNAL COMMUNICATION

OTC B3 Participants

Re.: **Mandatory Certification of FIX Messaging for Trademate (Private Fixed Income Securities)**

B3 hereby informs you that FIX messaging certification for Trademate private securities has been available since February 26, 2024, in a Market Data, Order Entry and Drop Copy certification environment (see External Communication 003/2024-VNC).

Participants that opt to use Trademate FIX messaging for private securities must schedule certification in advance.

Participants that already use the Trader FIX.Suite for automated order entry must adapt their processes and systems, for the start of mandatory certification, to Trademate FIX messaging. **Only participants that B3 has certified will be qualified to use Trademate FIX messaging in Production.**

B3 will announce mock trading session dates for the new version of Trademate soon. During these sessions, the Participants that B3 has certified will use Trademate FIX messaging.

029/2024-VNC

B3 will also announce the Production environment implementation date at an opportune moment.

The new Fixed Income platform's technical specifications, the Trademate FIX messaging catalogs and the test scripts are available at [New Fixed Income Platform – B3 Clients \(Trademate Platform\)](#), in the Technical Information and Support Material sections.

Further information can be obtained from Listed Certification by telephone on +55 11 2565-5023 or by email at tradingcertification@b3.com.br.
