Trading in the FRW will generate, at the end of the day, a position in the Mini U.S. Dollar Futures market.

The basis month futures contract price (Ft) is calculated by:

$$Ft = (WMCOt \times 1.000) + f$$

Where:

Ft = price of the Mini U.S. Dollar Futures Contract (WDO);

WMCOt= price generated by the USD/BRL spot rate fixed by WMR Reuters at 4:00 p.m. London time; and

$$\mathbf{f}_{\mathbf{t}}$$
 = FRW traded price quotation.

The financial results of the settlement will be transferred on the business day that follows the expiration date.

3. Special conditions

In situations not foreseen in this instrument, including, without limitation, those arising from acts emanating from government entities, regulators or other competent authorities as well as any others that directly or indirectly impact formation, calculation, representativity, publication, availability or continuity of the underlying asset or any of the variables of this contract, B3 will, at its sole discretion, perform the necessary measures, aiming for the settlement, continuity or extension of the contract on equivalent terms, based on its regulations.
