

Postponement of the Trademate Platform's migration to the On-Premises environment of the B3 Data Center

Intended for segment participants: OTC.

Summary: The date for the migration of the platform to the new environment has been put back to September 15, 2025.

Seeking to assure sufficient readiness for the adaptations needed for connection with the new environment, B3 informs you that the date has changed for the Trademate Platform to migrate to the On-Premises environment at the B3 Data Center. Migration was previously scheduled for September XX, 2025 and will now occur on **September 15, 2025**, which will allow all of our clients to prepare adequately for this transition.

We reiterate that migration will guarantee greater physical proximity with B3's central matching engines and with the Co-Location participants, enabling lower latency and greater agility in trade executions. The full list of IPs and ports can be found at [Trademate – FIX Connectivity](#).
