

FIX and Binary EntryPoint – Order Entry Interface: specifications update for new good-until order reposting functionality

Intended for segment participants: Listed.

Summary: New versions of the FIX and Binary EntryPoint specifications, as well as their dictionary and template files, are now available.

B3 hereby informs you that new versions of the FIX and Binary EntryPoint specifications, as well as their dictionary and template files, are now available.

This procedure is part of the continuous improvement of B3's trading systems and seeks to anticipate the planning of market participants for the launch of new products and functionalities.

Binary EntryPoint and FIX EntryPoint Specification – Order Entry

The order entry gateways – binary and FIX – will have the following changes:

- 35=8 message (ExecutionReport): Tag 378 (ExecRestatementReason), new “1” – GT domain renewal/restatement (no corporate action).

The EntryPoint specifications are now available at [EntryPoint | B3](#) and [EntryPoint | B3](#).

Update timetable

The dates for provision in the certification environments and for the go-live stages will be available at [B3 Tech Launches | Trading](#).
