4. Incentives

Investors will be granted the incentives until total points usage, or for up to 18 months from the Investor's registration into the Onboarding Incentive Program, whichever occurs first. B3 will formally specify the date of the Investor's registration into the Onboarding Incentive Program.

Each Investor will be entitled to exemptions on fees arising from trades in Eligible Products, as described below.

The fee exemption amounts granted as incentives will be represented in points depending on the access model predominant in trading, the volume of contracts in the derivatives markets (futures and options), and the financial value traded in the cash equities market, as follows.

Access Model		Total Points	Maximum points limit per product
Model 1	Investor who trades agricultural derivatives on B3	40,000	No limit established

	through a specific account previously related to CMN Resolution No. 2,687, revoked by Joint BCB-CVM Resolution No. 13/2024.		
Model 2	Investor who trades on B3 through an account previously related to CMN Resolution No. 4,373, revoked by Joint Resolution BCB-CVM No. 13/2024, who sends trading orders from outside the B3 co-location environment, using their own systems, those of a brokerage house or a provider.	80,000	No limit established
Model 3	Investor who trades on B3 through an account previously related to CMN Resolution No. 4,373, revoked by Joint Resolution BCB-CVM No. 13/2024, who sends trading orders from within B3's co-location framework, using their own systems existing in their hosting unit(s) contracted directly from B3 or through a brokerage house.	200,000	Up to 100,000 points in a single Eligible Product

The points will be available for use after B3's acceptance of the date of the Investor's admission into the Onboarding Incentive Program, and must be spent on exchange fees, fixed and variable registration fees, permanence fees, and settlement fees arising from trades with the Eligible Products the Investor has selected.

Each contract or equity asset traded represents a quantity of points, regardless of the nature of the security, the contract month, term, or type of equity asset or type of option, as shown in the following table.

--------------------------	---------

The Investor may include other Eligible Products or change access model, resubmitting the Instrument of Agreement through B3's Service Portal, as described in item 1. In this case, B3 may at its sole discretion accept the changes and increase the total number of points in the allowance. It should be noted that the duration of the Investor's link to the current Onboarding Incentive Program and the points that have already been used up will not change. Investors that do not spend the totality of points in the previous version of the Onboarding Incentive Program may request adhesion to the present Program (with a justification), with acceptance being at the sole discretion of B3.

If the Investor opts to migrate from an access model with a higher points level to a model with a lower one, the total points available will be the difference between the points granted for the model to which it is migrating and the points that it has already spent in the model to which it was originally registered.

If the Investor has spent more points than the total allowance for where it is migrating, it will not be eligible for the benefits of this Onboarding Incentive Program. If the Investor opts to migrate to a model with a higher points level, it will have the right to all the points in the model to which it is migrating, minus the points already spent in the model to which it was originally registered.

Any updates to the number of points announced after the Participant joins the Onboarding Incentive Program will not be applicable. In this case, the Points Table in force on the date of signature of the Instrument of Agreement will prevail.

5. Calculation of points and fee policy

B3 will calculate the number of points used daily. While the balance of usable points remains positive, and until their link to the Onboarding Incentive Program expires,

Investors will be exempt from all fees and charges on the products they designated when they joined the Onboarding Incentive Program.

It should be noted that, specifically for Options exercise on IBOV and SMALL, the points will be calculated based on the spread multiplied by the number of options and the Investor will be automatically registered for Options exercises when choosing to register for any of the options (IBOV, SMALL, Stocks, BDRs and ETFs).

Upon completion of the 18-month timeframe for using the incentive or when all points available have been spent, whichever comes first, B3 will adjust its systems and then resume charging to the Investor's account all fees and other charges applicable to each transaction executed, in accordance with the fee policy in force.

Furthermore, for an Investor who uses access model 3 and spends 100,000 points on a single Eligible Product, B3 will bill all fees and charges applicable to each additional transaction executed with the same Eligible Product. Any surplus points that the Investor has may be used in transactions with the other Eligible Products that it designates.

In the case of failure to comply, concealment, or omission of the requirements for the Onboarding Incentive Program, as set forth in item 1, the points used by the Investor during the validity of the Onboarding Incentive Program will be billed retroactively, with each point corresponding to USD1.00 (one United States Dollar) converted at the exchange rate (sell PTAX) for the last business day of the month prior to the billing date.

If the Investor executes trades in the **cash equities market** without complying with the minimum percentage for day trades as described in item 1, a charge of 0.0325% on the total volume traded will be billed retroactively, on the 15 of the month or on the first business day following the calculation period.

If the Participant exceeds the balance of points, there will be a retroactive charge for the points that were used by the Investor during the term of the Onboarding Incentive

Program, with each point being equivalent to US\$1.00 (one U.S. Dollar), converted at the exchange rate (sell PTAX) for the last business day of the month prior to the billing date.

If the Participant exceeds the points limit or does not meet the minimum percentage of day trades established in item 1, B3 may, at its sole discretion, exempt the Participant from retroactive billing of the exceeding points.

The Investor must indicate in the Instrument of Agreement which account should be used for retroactive billing.

Example

At the end of the 10th month of the link an Investor with 200,000 points has traded the following quantities of contracts:

Product	Contracts traded	Status
DI1	500,000	$500,000 \times 0.13 = 65,000$ points
DOL	145,000	$145,000 \times 0.68 = 98,600$ points
IND	5,000	$5000 \times 0.19 = 950$ points

So far, the Investor has used 164,550 points out of a total allowance of 200,000 points, leaving 35,450 points for use in the next eight months as long as no more than 100,000 points are spent on a single Eligible Product.

6. Final provisions
