

## PRODUCT OR SERVICE CHANGE

## Change to the Inclusion Criterion of the Carbon Efficient Index (ICO2 B3)

Aimed at segment participants: Counter and Listed.

Abstract: As of January 2026, B3's Carbon Efficient Index (ICO2 B3) will change its selection criteria to include the best company in each subsector even outside the 75% of companies with the lowest emission x revenue coefficients.

We hereby inform you that, as of the rebalancing of the Carbon Efficient Index (ICO2 B3) in January 2026, we will change the index selection criteria. Previously, it included assessing the efficiency of carbon emissions versus revenue generation, with a focus on companies among the 75% with the lowest emission indices.

With the change, if a subsector of one or more companies participating in the selection process is outside the 75%, the company with the best performance in that subsector will be maintained in the classification, provided that it meets the other criteria.

The new methodology will be used when preparing for the first preview of the composition to be disclosed on January 12, 2026.

The methodology of the Carbon Efficient Index (ICO2 B3) is available at [www.b3.com.br/en\\_us/](http://www.b3.com.br/en_us/), Market data and indices, Indexes, Sustainability indices, Carbon Efficient Index (ICO2 B3).
