B3 Index Licensing Commercial Policy

Destined for segment participants: OTC; Listed.

Summary: The new Index Licensing Commercial Policy aims to establish guidelines and rules to license and reference B3's proprietary indices in financial products.

B3 informs you that the new Index Licensing Commercial Policy will come into effect as of the publication of this Circular Letter, with the central aim of establishing guidelines and rules for use of B3 proprietary indices in financial products.

The financial products to which this policy pertains are: Structured Transaction Certificates (COE) and Investment Funds.

In light of this, the COE issuers and Investment Fund managers that use B3 indices must carry out the due licensing process with B3. The new Index Licensing Commercial Policy, alongside the contracting and trading procedures defined for each product, are provided on the [B3 website](#).

This initiative seeks to provide greater standardization, legal security, and alignment with international best practices, for the use of financial product indices that are the intellectual property of B3.
