

Vehicle Financing Market

February/2022

INTRODUCTION

The vehicle financing market structure was developed by B3 together with financial institutions as a solution to bring agility and security to the process of collateral provision in the Brazilian financial system.

SNG (National Liens System) is a system that manages the financial restrictions on motor vehicles, and its main objective is to provide banks, lending firms, leasing companies and purchasing pool administrators with information about vehicles offered as collateral in a credit transaction.

After SNG was created, fraud involving credit transactions for vehicle financing in the Brazilian market was virtually extinguished.

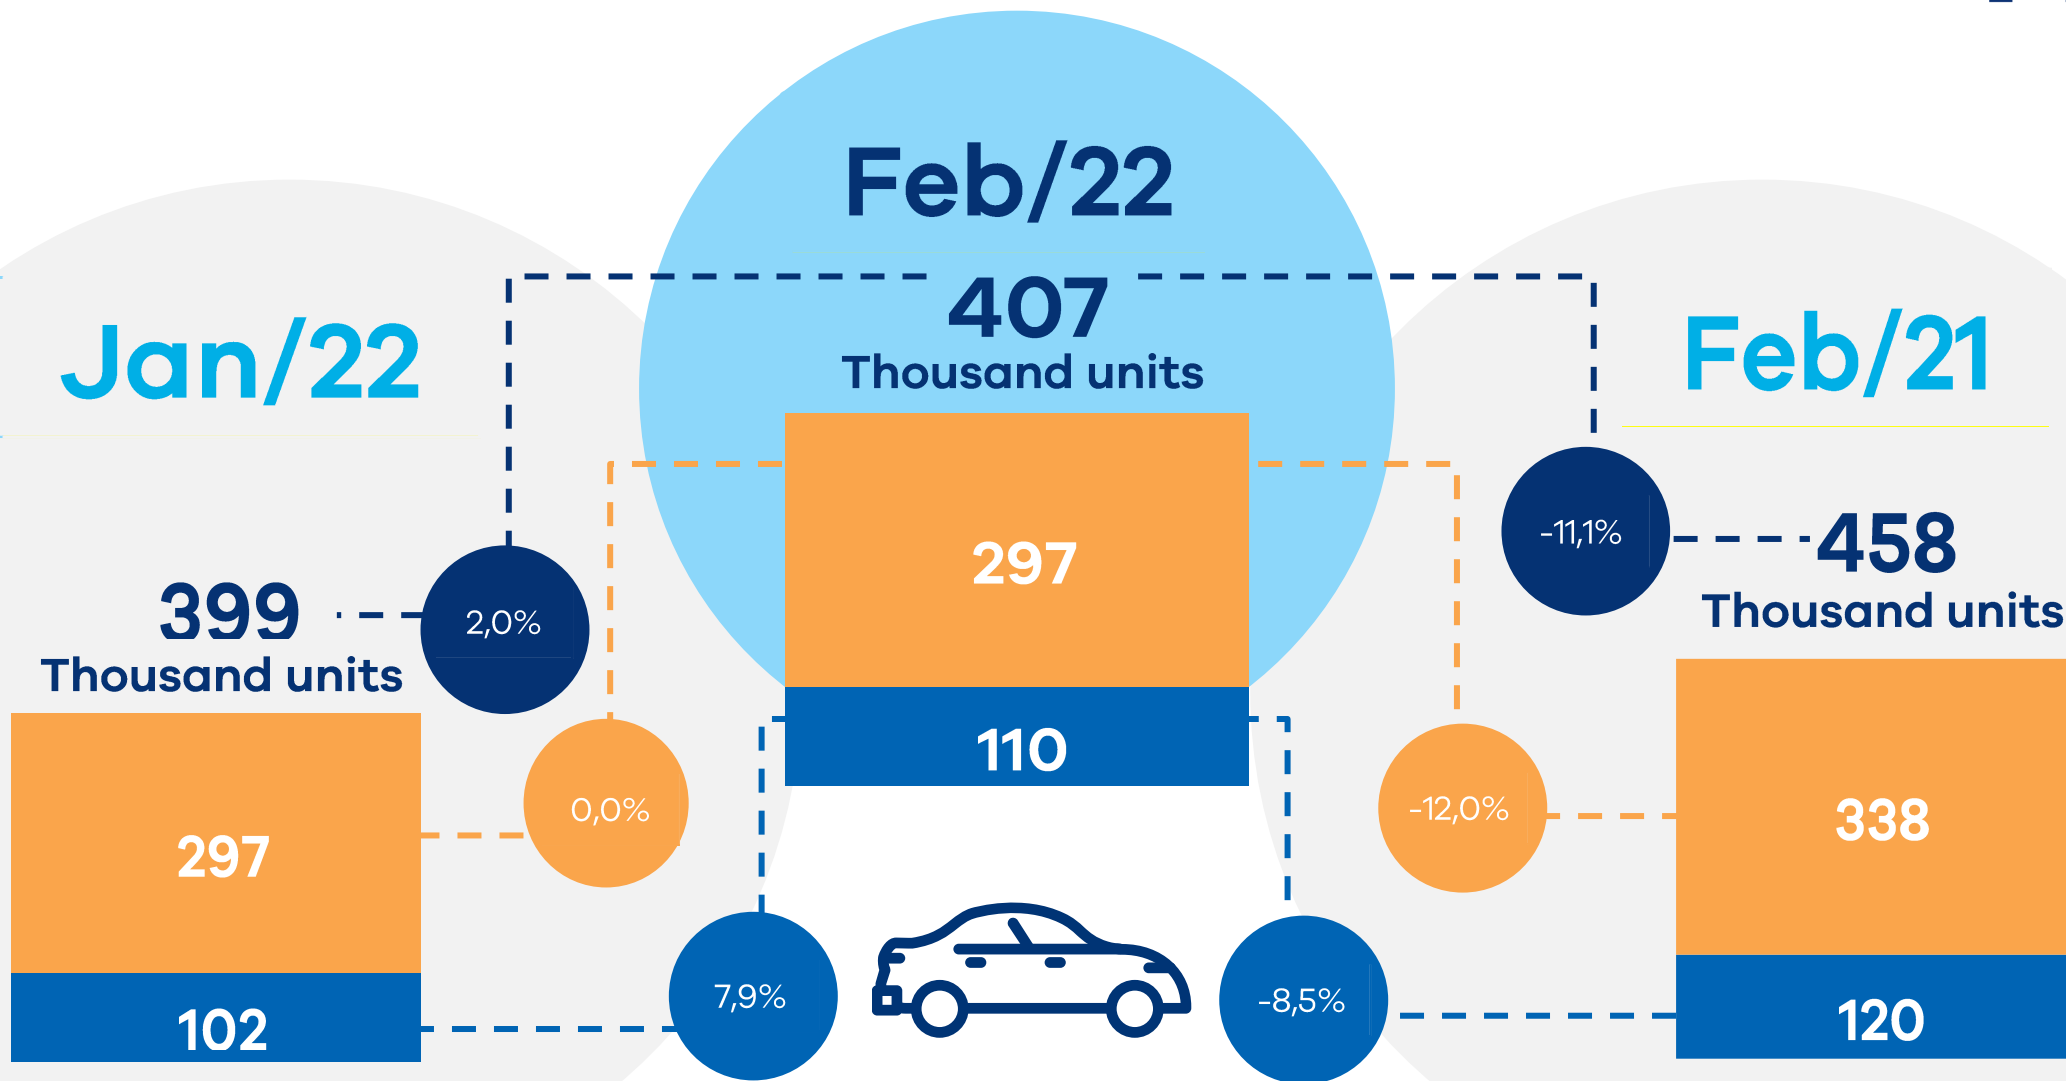

This file contains detailed information on the performance of the Brazilian vehicle financing market and on the penetration of financing on vehicle sales (source: Fenabrave) and comes as a complement to the vision of the vehicle credit portfolio (source: Central Bank of Brazil).

AGENDA

- 1 VEHICLE FINANCING DATA
- 2 VEHICLE FINANCING VS. SALES
- 3 CREDIT DATA ON VEHICLE PURCHASE
