

BTB Platform Terminal and API

Guidance for contracting and accessing the
Terminal and API of the BTB Platform

CONTRACTING

1 Please see the Commercial Policy

Please see the Commercial Policy of the Terminal and API of the BTB Platform to determine which interface (Terminal or API), market segment and profile are suitable for your institution and your needs.

2 Request the contracting

If your institution accesses B3's systems via Extranet:

Request from the privileged user of your institution access to the BTB Platform, indicating the interface you wish to access (Terminal or API) and the profile desired.

If your institution accesses B3's systems via Internet:

Fill out the contracting form and send it via email to servicecontracting@b3.com.br.

In the contracting process, you can also choose access to the certification environment, for carrying out tests, or direct access to the production environment of the BTB Platform.

3 Receipt of credentials

You will receive the credentials for the access to the BTB Platform via email, regardless of the options made in the contracting process. Now you are ready to make your access!

ACCESS

4 Access addresses

BTB Terminal – Production:

- [Click here](#) for access via Extranet
- [Click here](#) for access via Internet

BTB Terminal – Certification:

- [Click here](#) for access via Extranet
- [Click here](#) for access via Internet
